Patna, Bihar

EDUCATION

March 2022 - September 2022

CENTRE FOR DEVELOPMENT
OF ADVANCED COMPUTING
(C-DAC), MUMBAI

- Post Graduate Diploma in Advanced Computing (PG-DAC)
- 73%

July 2015 - June 2019

SANT GADGE BABA AMRAVATI
UNIVERSITY

- Bachelor of Engineering
- CGPA: 7.4/10

SKILLS

- **Programming Languages**
 - JavaScript, Java, HTML, CSS
- **Frameworks & Libraries**
 - React.js, Node.js, Express.js
 - Spring Boot, Spring Framework
 - Bootstrap
- **Databases**
 - MySQL, MongoDB, PostgreSQL
 - Advanced SQL programming
- **Tools & Technologies**
 - Git, Docker
 - Eclipse IDE
 - RESTful API Development
 - Microservices Architecture
- **Conceptual Expertise**
 - Software Development Life Cycle (SDLC)
 - Test Automation
 - Performance Optimization
 - Cloud Computing Concepts

PROFILE

Accomplished Full Stack Developer with extensive expertise in enterprise software development, specializing in web and mobile application design. Proven track record of delivering robust solutions using cutting-edge technologies, with strong capabilities in software architecture, performance optimization, and cross-functional collaboration

WORK EXPERIENCE

Project Engineer

DECEMBER 2022 - PRESENT

Centre for Development of Advanced Computing (C-DAC), Patna, Bihar

Manufacturing Unit Monitoring System

- Developed comprehensive SpringBoot-based monitoring system for manufacturing operations
- Implemented real-time data tracking and advanced analysis features
- Designed scalable backend architecture with robust performance metrics.

Library Management System (December 2022 - January 2023)

- Created Java-based library management application using Eclipse IDE
- Developed core functionalities including book cataloging, user management, and lending tracking
- Implemented efficient database operations and intuitive user interface design
- Utilized object-oriented programming principles for robust system architecture.

GLAMS (Gamified Learning and Assessment Management System) (January 2023 - Present)

- Architected full-stack application using React.js, Node.js, MySQL, and MongoDB
- Developed comprehensive modules: Leaderboard, Profile, Star Rating System, Admin Dashboard
- Enhanced user interface with Particle.js Library
- Implemented Docker and Git for infrastructure management
- Conducted rigorous functional testing ensuring system reliability

LearnDex Project (June 2023 - August 2023)

- Integrated frontend and backend components for User Review, Credit Management, Course Management
- Utilized React.js, HTML, and Bootstrap for responsive interfaces
- Performed comprehensive functional testing.

KEY ACHIEVEMENTS

- Represented GLAMS Project at GPAI (Global Partnership on AI) summit
- Successfully deployed GLAMS beta version
